

Decoration for a flowerpot, bouquet or cake

1. Print the template with an elongated heart, or draw your own heart, colour it, and cut it out. Fold it like an accordion, so that each fold is about 1 cm high. Make a hole in the middle with a larger needle or a nail through all the layers. Thread the “accordion” on a skewer through the hole and carefully stretch the heart to normal height.

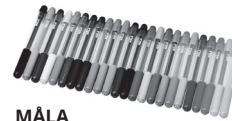

2. Cut a rectangle about 10×15 cm from the paper. Colour it and fold it like an accordion, so that each fold is about 1 cm high. Then thread it on a skewer in the same way as described in the first tip. Make a nice bow from the “accordion”, cut two identical hearts out of paper and glue them together at the upper end of the skewer.
