Third party License Information

Design and Quality
IKEA of Sweden

Free and Open Source Software

This IKEA Home smart product contains Free and Open Source Software components. The applicable licenses and any further information to be provided under the applicable Free and Open Source Software licenses are available on the product directly. Please see below further detailed access information.

Current Software Bill of Material availability

This IKEA Home smart product includes Free and Open Source Software components. As the product may be updated, to allow for up-to-date information and license compliance, the current list of the software components, copyright and license information as well as further information to be provided under the applicable Free and Open Source Software licenses are available on the Home smart product itself at http://<ip-address-of-the-device>:8082/, and can also be found in the mobile application. In addition, you can also access the information through the IKEA Home smart Open Source Code Center at https://gpl-code.ikea.com.

Source code availability

Source code of the software components licensed under Open Source Software Licenses requiring source code delivery (e.g. GNU GPL, GNU LGPL, etc.) is available in the IKEA Home smart Open Source Code Center available at https://gpl-code.ikea.com.

IKEA also offers to give any third party a complete machine-readable copy of the corresponding source code components for a charge no more than the cost of physically performing source distribution.

For more information, visit IKEA Home smart Open Source Code Center at https://gpl-code.ikea.com, contact IKEA Home smart Open Source Code Center representative at opensource.sw.gl@ikea.com or write to:
