FIXA

Products for assembling, fastening and protecting your furniture

SAFETY

Before using FIXA tools read thoroughly through the instructions that come with each tool.

When fastening objects (cabinets, shelves, frames, lamps etc) to your wall or ceiling you have to be aware that different wall materials require different types of fixing devices. Use fixing devices suitable for the walls in your home.

Also be aware of that different wall materials are able to support different loads of weight. For instance, wall made of plaster cannot support as much weight as walls made of wood, concrete or brick.

If you have any doubts regarding what kind of walls you have in your home, how much load they can carry or how to securely fix objects onto your walls or ceiling you must contact a specialised local dealer for advice.

Objects that are not secured safely onto the wall or ceiling can cause fatal accidents.

Do it all with FIXA

When it comes to getting handy around the house, the FIXA series has everything you need to get the job done. No matter what the job might be. Whether you're taking on bigger tasks such as sawing through heavier materials, assembling furniture or fastening furniture to the walls or ceiling, or simply need to hang a poster or protect your floor from scratches, FIXA has the tools to help.

Durable lithium-ion batteries

FIXA cordless power tools run on lithium-ion batteries, which can be recharged about 500 times. That's equal to recharging a power tool every other week for around 20 years! The batteries have a low self-discharge rate and the Electronic Cell Protection (ECP) protects against deep discharge, overloading and overheating, which could damage the battery. What all this means is that FIXA cordless power tools are fit and ready for work whenever you need them!

All the products (shown here) may not be available at the store. Please contact the staff or look at www.IKEA.my for more information. For more detailed product information, see the pricetag and the Internet. All units require assembly.
